DETAILED ACTION

1. Applicant's communication submitted on January 16, 2007 is acknowledged.

Allowable Subject Matter

2. Claims 1-43 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Prior art of record fails to disclose or fairly suggest the following limitations:

- A particle accelerator system, comprising an accelerating section directly coupled to the bunching section, the accelerating section being operable to receive bunched charged particles from the bunching section and to accelerate the bunched charged particles, the accelerating section defining a port for receiving radio-frequency power, wherein the port comprises a sole and only port of both of the accelerating section and the bunching section for receiving radio-frequency power, in combination with the remaining claimed limitations as claimed in independent claim 1 (claims 2-11 are allowed for depending on claim 1).
- A particle accelerator system, comprising a injector, a bunching section, an accelerating section operable to receive bunched charged particles from the bunching section and to accelerate the bunched charged particles, and a resonant coupling cavity interposed between the bunching section and the accelerating section, in combination with the remaining claimed limitations as claimed in independent claim 12 (claims 13-31 are allowed for depending on claim 12).

Application/Control Number: 10/531,126
Art Unit: 2821

Page 3

- A particle accelerator system, comprising an injector; a bunching section, wherein each the bunching cavity has a dimension extending in the direction and the dimension of each the bunching cavity of the plurality of bunching cavities increases in magnitude for each the bunching cavity positioned successively in the direction, and wherein the bunching cavities are operable to receive charged particles from the injector and to bunch the received charged particles; and an accelerating section directly coupled to the bunching section, the accelerating section being operable to receive bunched charged particles from the bunching section and to accelerate the bunched charged particles, in combination with the remaining claimed limitations as claimed in independent claim 32 (claims 33-43 are allowed for depending on claim 32).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Fujisawa (U.S. 5,825,140) discloses a radio frequency type charged particle accelerator.

Franzen (U.S. 5,572,035) discloses a method and device for the reflection of charged particles on surfaces.

Application/Control Number: 10/531,126
Art Unit: 2821

Page 4

Etievant et al. (U.S. 5,376,893) discloses a resonant cavity electron accelerator.
